

DSA **Sorting** Exercise: part-2

Q1. Selection Sort(find smallest first) :

Input: 8, 4, 1, 9, -3, 6, 5

Output: -3, 1, 4, 5, 6, 8, 9

Q2. Selection Sort(find largest first) :

Input: 8, 4, 1, 9, -3, 6, 5

Output: -3, 1, 4, 5, 6, 8, 9

Q3. 2 Sum–Find a pair with given sum–

–($O(n \log n)$) :

Input: arr[] = 7, 0, 4, 3, 2, 8, 10 , target: 9

Output: true

Explanation: arr[0] + arr[4] = 9 , so it return true

Q4. Common Element

Input: a[] = [3, 4, 2, 2, 4] , b[] = [3, 2, 2, 7]

Output: 2, 2, 3

Explanation: The common elements in sorted order are [2, 2, 3]
